# SPACE MISSION ANALYSIS

OVERVIEW

SPACE MISSIONS

ROCKETS

## SUMMARY

This dashboard contains **60 space missions** conducted between **1961 and 2023**, representing missions from major global space agencies and private organizations including **ISRO, NASA, SpaceX, CNSA, Roscosmos, ESA, JAXA, Blue Origin, and OneWeb**. The data captures a wide range of mission types such as **Lunar, Mars, Satellite Deployment, Communication, Earth Observation, Crewed, Scientific, and Commercial missions**.

The missions originate from **multiple launch sites worldwide**, including **Sriharikota, Kennedy Space Center, Cape Canaveral, Baikonur, Kourou, Vandenberg, Jiuquan, and Tanegashima**, highlighting the global nature of space exploration.
